WALKER MAGNETICS

R SERIES

RARE EARTH

PERMANENT SUSPENDED MAGNETIC SEPARATORS

The "R" Series of Permanent Magnetic Separators are currently designed to provide an extremely powerful magnet, yet light in weight, for Mobile Crushing Plants.

These units provide field intensities that are equal to, and in many cases, superior to electro magnets, which were used in these applications. They are ruggedly built to remove re-bars and wire mesh, even with attachments of concrete.

Stainless steel clad belts can be supplied as an option, to increase belt life in these severe operating conditions. You do not require a power supply and hydraulic motors can be supplied on request.
